Release Summary

The purpose of this Release Notes document is to provide a brief, informative summary of the features added to the Swim integration with TeamPages.

Product Features

Sign up on TeamPages using Active Passport

TeamPages club manager who has an existing Active Swim Manager should be able to select their Active Swim Manager Agency and link it with their new club on TeamPages when signing up on TeamPages. Please visit www.teampages.com/swim to create your new swim club on TeamPages using your Active Passport account.

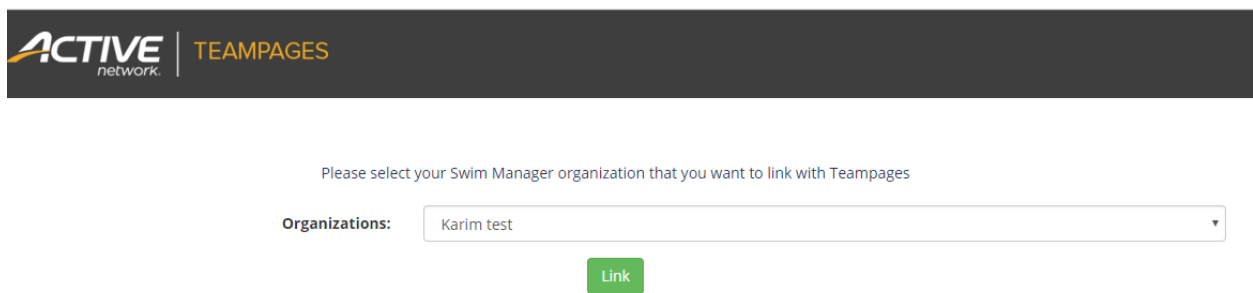

The screenshot shows a sign-up form with the following fields and elements:

- Title:** Create Your New Website Today!
- Name:** Input field with placeholder text "Your Full Name".
- Phone:** Input field with "(optional)" label to its left.
- Email:** Input field.
- Password:** Input field.
- Club Name:** Input field.
- Submit Button:** A large orange button labeled "CREATE MY NEW SITE".
- Footer:** A line of text stating "By creating an account, you are agreeing to our [General Terms](#) and [Product Terms](#)".

Link Swim Manager Organization with TeamPages

Creating new club on TeamPages allows for Swim Manager organization to be linked with TeamPages. The purpose of linking Swim Manager organization with new TeamPages organization is to allow future flow of information from Swim Manager to TeamPages.

Please select your Swim Manager organization that you want to link with Teampages

Organizations: Karim test

Link

Figure 2 Organization Linking Page

Pull new and updated programs to TeamPages

Swim Manager administrator will need to create new programs or update existing programs on Swim Manager. TeamPages will display newly created program as well as the changes to details made on existing programs in Swim Manager. The page will be cached with the new and updated programs, and data will be pulled upon page load once the cache is expired. The cache expires every 6 hours.

List and Link registration programs

When Swim Manager organization is linked with TeamPages, Registration page is displayed on TeamPages that lists the programs and their information, so that a visitor gets redirected to Active registration page to register for programs.

Displaying Meets on TeamPages

You should be able to see a detailed view of meets and events, populated with data from Swim Manager. Swim Manager administrator will need to create new or update meets on Swim Manager. The meets will need to be displayed on TeamPages after they are created or updated in Swim Manager. The page will be cached with the new and updated meets and data will be pulled upon page load once the cache is expired. TeamPages should also display events in TeamPages after they are created in Swim Manager. The cache expires every 6 hours.
