

We have the ability to email and text parents and athletes. When you go into your portal you can have two parents setup to receive emails and texts. If your athletes have email addresses or a cell phone you can set them up to receive this information as well.

We do have the ability to select who receives the information as anything pertaining to parents only would only be sent to the parents.

In order to receive text messages your cell phone number must be setup in the cell phone field. Entering your cell phone in another phone number field will not allow you to receive texts. We don't texts out often as we try to keep this form of communication for last minute changes, cancellations or other forms of emergency communication.

The following link:

<http://titanswimming.com/clubs/6145/documents/524821>

will show you what it looks like to edit your information from a computer. If you use a tablet it will look similar. If you try and do so from your phone this will look different but you can still do everything as shown in document.

I am always available to help but I ask that you please follow the directions if you need to update prior to asking for assistance.

Thank you
Mike Griffin
